

AARON S. KESSELHEIM

Aaron S. Kesselheim, M.D., J.D., M.P.H. is an Assistant Professor of Medicine at Harvard Medical School and a faculty member in the Division of Pharmacoepidemiology and Pharmacoeconomics in the Department of Medicine at Brigham and Women's Hospital. He received his postgraduate training at the University of Pennsylvania School of Medicine and Law School, and most recently at the Harvard School of Public Health. He is Board Certified in Internal Medicine, serves as a primary care physician, and attends on the general medicine inpatient service at BWH. His research focuses on the effects of intellectual property laws and regulatory policies on pharmaceutical development, the drug approval process, and the costs, availability, and use of prescription drugs both domestically and in resource-poor settings. He has also investigated how other issues at the intersection of law and public health affect the health care system, including health care fraud, expert testimony in malpractice cases, and insurance reimbursement practices. His most recent work is funded by a career development grant from the Agency for Healthcare Research and Quality and a Robert Wood Johnson Investigator Award in Health Policy Research. In 2010, he received the Alice S. Hersh New Investigator Award from AcademyHealth, the main professional organization for health services/policy research. The Hersh award is given annually to an outstanding health services researcher under age 40 in the US. He is a member of the New York State Bar and is a Patent Attorney.
